

Christ-Centered Recovery

Giving New Hope For A Transformed Life

Our Mission is to help those struggling with addiction to build a recovering identity in Christ in a centered, safe, structured therapeutic environment.

Our professional clinical staff members are caring people who work closely with clients to integrate sound Biblical and Christ-centered direction with proven 12-step recovery principles.

The Recovery Place Christ-centered therapy is combined with traditional alcohol and drug addiction treatments in order to create a unique treatment plan that is specific to each client. We provide a caring and therapeutic setting for our clients so they will feel the unconditional love and acceptance of a God who is able to restore their broken hearts and shattered lives.

Our Christ-centered program includes:

- Individual counseling to address the barriers of shame, guilt and forgiveness, and to provide coping skills to deal with life's most challenging problems.
- Primary therapy groups five days a week, facilitated by a Christ-centered counselor.
- Frequent Bible study sessions throughout the week to help clients explore God's inspired Word and apply it to their recovery process.
- · Bible teachings focused on re-establishing and building faith.
- · Implementing the Christ-centered 12-steps to recovery.
- · Local church visits geared towards building relationships within a healthy Christ-centered community
- Developing life-skills to successfully transition back into society.
- Family-structured program is designed to provide Christ-centered support and empower families.

In order to help our clients develop a stronger faith in Christ, the community attends vibrant Bible-based churches in the community along with Celebrate Recovery support groups and local AA/NA meetings. Clients have the opportunity to participate in monthly Baptisms, music concerts facilitated by Christian artists and community activities hosted by local churches in the area.
